Quasar absorption spectroscopy

Ground telescopes | Large samples at $z < 0.4$

UV

Optical

Ca II

$z = 0$

A diagram illustrating the spectral range of ground-based quasar absorption spectroscopy. It features a horizontal bar with a dark blue 'UV' section on the left and a lighter blue 'Optical' section on the right. A vertical line separates the two. In the 'Optical' section, a 'Ca II' absorption line is depicted as a sharp dip. Below this dip, the text 'z = 0' is written. The overall title 'Quasar absorption spectroscopy' is in the top right, and 'Ground telescopes | Large samples at z < 0.4' is in the top left.

Quasar absorption spectroscopy
